

## IN CASE OF A FIRE

- **GET OUT**
- **STAY OUT**
- **CALL THE FIRE BRIGADE OUT (DIAL 999 or 112)**

The house is equipped with the following automatic fire warning devices:

- Heat detectors in the kitchen and the kitchenettes.
- Smoke detectors in each bedroom, in the kitchen & lounge, in the hallway, and on the first floor landing.

The smoke detectors are interconnected and all alarms will sound even if just one is activated. Never ignore an alarm, even if you cannot see any fire or cannot sense any smoke!

If you spot a fire before an alarm sounds you should repeatedly shout FIRE to alert everyone who may be in the house and either tackle the fire using the equipment provided or close the door if possible to contain the fire and exit the building immediately shouting warnings as you leave.

### Tackling a Fire

Fire extinguishers and fire blankets have been provided.

**You should only attempt to extinguish a fire if you feel confident that it is manageable.**

**DO NOT attempt to tackle a fire if you consider it would put you at risk and stop you exiting the building safely.**

Familiarise yourself with how to use the fire extinguishers and fire blankets and the types of fire they are appropriate for; basic information is printed on the devices.

### Fire Equipment Locations and Type

Kitchen, lounge, hallway, first floor landing - Fire extinguisher (powder), suitable for all types of fire

Kitchen & kitchenettes - Fire Blanket, suitable for smothering a fire like a flaming frying pan

### Fire Evacuation Procedure

When the fire alarm sound exit the building promptly, repeatedly shouting "Fire, fire, get out", and shut the doors behind you to contain the fire.

When safely clear of the building dial 999 (112 from a mobile) for the fire brigade and await their arrival.

Notify the following people as soon as it is safe to do so:

Polly Rawlings – 07743 308 193, Thim Engel – 07810 755 423

**Do not re-enter the building until it is deemed safe to do so**
